

# Building Bridges: Uniting the Strengths of Indigenous Peoples

7th International Indigenous  
Pre-Conference on HIV and AIDS

July 21-22, 2018

De Nieuwe Liefde | Amsterdam  
Da Costakade 102

**The 2018 International Indigenous Pre-conference on HIV & AIDS** is themed around building bridges across the world and uniting our strengths in order for Indigenous Peoples to take their rightful place on the international stage.

It is an opportunity for Indigenous Peoples from all over the world and their allies to share wise and promising practices, learn from each other and build relationships across continents, cultures, traditions, and languages.

The Netherlands have been a long-standing champion of diversity and inclusion. Which will provide a stimulating space for collaboration, and in turn will give rise to a powerful Indigenous-led global response to HIV and AIDS.

Our aim is that with the meaningful engagement of Indigenous Peoples we will get the world working together - not only to address HIV in Indigenous communities, but also to serve our critical role in closing global target gaps.

## What to Expect:

- Topics ranging from harm-reduction regimens to leadership advocacy, clinical case presentations, lively panel discussions, keynotes, and cultural exchanges.

## Call for Equity Partnerships:

- This is also a call for leadership, science and community partnerships to advocate for Indigenous Peoples and to empower Indigenous people to lead. We are seeking equity partnership opportunities with organized community groups, ministries of health or national research centres, academics and researchers.

## 7<sup>th</sup> International Indigenous Pre-conference on HIV & AIDS Building Bridges Uniting the Strengths of Indigenous Peoples
